

# General Specifications

## Model WU11 Interconnection Cable for SENCOM sensor

The WU11 interconnection cable is specified for reliable transfer of digital signals between the SENCOM sensors and Yokogawa FLXA analyzer.

It is especially designed to be installed in a heavy industrial environment.

The cable is water proof, allowing it to be submerged as a whole.

The cable has a wide temperature operation range which is sufficient for most of the applications.

The materials used for the cable are flame retardant to resist the spread of fire.

### Features

- Double shielding to protect connected devices for interference from high voltages and currents
- Available in four different lengths. Long cable runs up to 60 m (197 ft) are possible
- Easy connection to a SENCOM pH Sensor by one 5- pins molded connector, and to the analyzer by 5 wired pins
- Flame retardant recognized by UL (file no. E124763) and CSA (file no. LL105324)
- IP67
- Operating temperature from - 40°C up to + 85°C (-40°F up to +185°F)
