AWT420
Universal 4-wire, dual-input transmitter

Measurement made easy
The most versatile general process transmitter for water analysis

Universal modular design
- mix-and-match a wide range of analog and advanced digital EZLink™ sensors
- factory calibrated sensor and communication modules minimize stock holding and maximize operation uptime
- wall-, panel- or pipe-mountable

Easy to use
- intuitive software with full-color graphical display
- plug-and-play digital sensor connection using EZLink technology
- 'Easy Setup' menus provide step-by-step guidance

High functionality at minimum cost
- dual channel PID control
- full audit trail capability for improved regulatory compliance
- secure data archiving to SD card

Integrated Bluetooth® for direct connection to your smart device
- view device data in real time or analyze later in offline mode
- access the latest software updates and essential sensor information
- keep track of maintenance tasks and view maintenance logs at a glance

Flexible communications
- HART, Ethernet, PROFIBUS DP or MODBUS digital communications
- advanced self-diagnostics conforming to NAMUR NE 107 provide harmonized indication of device status

The AWT420 dual-input transmitter

The AWT420 dual-channel transmitter provides true flexibility for measuring a wide variety of parameters in a single device. Packed with a host of features including Bluetooth connectivity, dual PID control and EZ-Link sensor connection, water analysis has never been easier.

Operation simplicity is a key feature of the AWT420 with its powerful, yet intuitive software, advanced self-diagnostics and its unique modular design that enables users to achieve increased efficiency through greater user flexibility, reduced process downtime and simplified maintenance.

The robust IP66 enclosure can be easily wall-, pipe- or panel-mounted. The hinged door with anti-tamper indication provides unrestricted access to the communication and sensor modules for simplified commissioning and maintenance.

The AWT420 transmitter can be used with either analog or digital EZLink sensors for a wide range of applications including drinking water, wastewater, industrial water and power.

Versatile modular design
The unique modular design of the AWT420 enables the same unit to be used with any of the available or future sensor and communication modules, minimizing stock holding and maximizing operational uptime.

Each module is factory-calibrated and can be quickly and securely installed by hand in seconds, providing the ultimate in transmitter adaptability.
Sensor compatibility

pH and redox (ORP) measurement
The AWT420 pH/ORP module is compatible with ABB's full range of analog pH, redox (ORP) sensors in addition to most competitors' sensors.

For measuring process liquids that change pH value based on temperature, a pH solution coefficient can be entered that compensates the Nernstian value for pH measurements, and the raw voltage value for ORP measurements, by a fixed value per each 10 °C (18 °F).

Conductivity measurement
The AWT420 fully supports ABB's range of 2-electrode and 4-electrode sensors for conductivity, resistivity, concentration and inferred pH measurement making the AWT420 suitable for installations ranging from ultra-pure water to harsh chemical applications.

For users that use conductivity to infer liquid concentration a concentration curve can be entered using the 6-point linearizer table.

EZLink digital sensors
The AWT420 EZLink module is compatible with ABB's range of EZLink digital sensors providing plug-and-play sensor connectivity, automatic sensor recognition/set-up and advanced predictive diagnostics.

Compatible EZLink digital sensors:

Parameter	Sensor
pH/ORP	100 GP-D, 100 ULTRA-D, 500 PRO-D, 700 ULTRA-D
Turbidity/Suspended solids	ATS430
Dissolved oxygen	ADS430

Turbidity measurement
The AWT420 fully supports ABB's 4690 range of turbidity systems for use throughout the potable water treatment process.

With the product verification process the user is notified when a primary calibration is required, this promotes minimal product maintenance while maintaining product accuracy.

—

Flexible communications

The AWT420 transmitter is available with a wide choice of user-selectable communication modules including HART, Ethernet, PROFIBUS DP V1.0 or Modbus RS485; enabling simple device integration.

The Ethernet module contains an embedded webserver that enables the unit to be viewed remotely and fully controlled securely via a web browser. Configuration data and process data can be downloaded via secure FTP connection.

Communication modules can be configured when purchased or easily retrofitted in the field.

—

Direct connection to your smart device

Connect to any iOS or Android device via Bluetooth using the EZLink connect app to access essential sensor information wherever and whenever you need it to ensure your process is continually operating at maximum efficiency.

From checking your audit logs to downloading the latest software through your smartphone, we are confident that EZLink connect will make your life that little bit easier by providing you with a wealth of information and services to support you wherever and whenever you need it.

- Easily and securely connect to your device to view all measurement, diagnostic and audit data in real time or analyze later in offline mode
- Access the latest software updates and essential sensor information direct through your smartphone
- Keep track of all current and upcoming maintenance tasks and view completed maintenance logs at a glance

Easy to use

ABB's intuitive HMI is both powerful, yet user-friendly with simple navigation and clear menus presented on the large easy-to-read full-color graphical display. **Easy Setup** sensor configuration menus provide step-by-step guidance for commissioning new sensors and the advanced self-diagnostics conforming to NAMUR NE 107 provide harmonized indication of device status.

Graphical trending

Measurement trends of each sensor can be viewed locally easily and clearly on the graphical color display.

Color-coded trace
(one for each sensor)
Process value
Sensor ID
(color-coded)
Trace time/date
Full audit trail capability

The AWT420 transmitter records all data to its internal memory continuously. This includes both event log/configuration data in addition to measurement data. The transmitter's event log files contain audit log, alarm log, diagnostic log and calibration log data that is time- and date-stamped, providing the operator with full audit trail capability.

Secure data archiving to SD card

Process data and historical logs can be securely archived to an SD card for record keeping or analysis using ABB's DataManager Pro data analysis software.
Simplified calibration

With the AWT420 **One-Button Calibration** feature, sensor calibration can be initiated directly without the need to access the device menu, reducing overall time spent calibrating sensors.

Secure process control

Multi-level security access prevents unauthorized modification of process control data by enabling separate read-only, calibrate and advanced security access levels to users.

—

Advanced process control functionality as standard

Dual channel PID control

The AWT420 transmitter incorporates three-term PID control, offering three modes of sophisticated control:

- analog
- pulse length (time proportional)
- pulse frequency.

Control functionality is available for both channels of the AWT420 transmitter and are configurable for reverse or direct-acting control. pH channels are configurable for reverse-acting, direct-acting or dual (acid/base) control.

Cation conductivity and inferred pH measurement

In low conductivity, ammoniated boiler waters, the AWT420 transmitter can calculate an inferred pH measurement from the conductivity and a pre-set ammonia concentration.

For inferred pH measurement calculations, the AWT420 uses the inputs from two conductivity sensors, i.e. before and after cation exchange column. The AWT420 software contains a number of inferred pH calculations to allow for different chemical conditions, i.e. whether or not the system is an NH_3, NH_3+NaCl or NaOH dosed system.

Self-monitoring of the validity of the pH measurement is achieved by checking that an after-cation conductivity value is sufficiently low. This measurement is provided by the second input of the AWT420 transmitter. Alarm contacts can be configured for cation conductivity, invalid pH and exhausted resin.

Advanced dual-conductivity calculations

In addition to inferred pH measurement, the AWT420 provides advanced dual-conductivity calculations used across a range of industrial processes including demineralization and reverse osmosis control.

The AWT420 is able to calculate, display and transmit the difference, ratio, % passage or % rejection between two conductivity sensors.

Automated sensor cleaning

The AWT420 transmitter can automate sensor cleaning regimes to reduce operational expenditure and ensure effective sensor measurement. Pulsed or continuous cleaning routines can be assigned to any of the relays or digital output. The frequency and duration of the cleaning can be tuned to meet the specific requirements of the application.

Specifications

Operation

Display

89 mm (3.5 in) color ¼ VGA TFT, liquid crystal display (LCD) with built-in backlight and brightness/contrast adjustment

Language

English, German, French, Italian, Spanish, Portuguese, Russian, Turkish, Chinese, Polish

Keypad

6 tactile membrane keys:

- Group select/Left cursor
- View select/Right cursor
- Menu key
- Up
- Down
- Enter key

No. of inputs

Up to 2 analog or digital sensors

Mechanical data

Protection

IP66/NEMA 4X

Dimensions

- Height: 144 mm (5.67 in) minimum (excluding glands)
- Width: 144 mm (5.67 in) door closed – min.
- Depth: 99 mm (3.89 in) door closed – min. (excluding fixing brackets)
- Weight: aluminum enclosure
    1.36 kg (3 lb) approx. (unpacked)
- Weight: polycarbonate enclosure
    1 kg (2.2 lb) approx. (unpacked)

Panel dimensions

- Cut-out height: 138 +1 –0 mm (5.43 +0.04 –0 in)
- Cut-out width: 138 +1 –0 mm (5.43 +0.04 –0 in)
- Thickness: 6.35 mm (0.25 in) max.
- Depth behind panel: 100 mm (4 in) min. (after fixing with brackets to panel)
- Distance between cut-outs: 40 mm (1.57 in) min.

Materials of construction

- Aluminum enclosure – LM20 aluminum
- Polycarbonate enclosure – LEXAN 505RU
    10 % glass-filled polycarbonate

Cable entries

- Five holes to accept M20 or ½ in cable glands or conduit hubs
- Two holes to accept M16 cable glands or conduit hubs or EZLink connectors

Security

Password protection

Access to configuration levels is enabled only after the user has entered a password:

- Calibrate level: user-assigned password
- Advanced level: user-assigned password
- Service level: service level user-assigned password

Electrical

Supply voltage

100 to 240 V AC ±10 %, 50/60 Hz
24 V DC (18 min. to 36 V DC max.)

Power consumption

<15 W

Terminal connections rating

Solid/Flexible wire: AWG 24 to 16 (0.2 to 1.5 mm^2)
Ferrule with plastic sleeve 0.2 to 0.75 mm^2
Ferrule without plastic sleeve 0.2 to 1.5 mm^2

Cable specification

Cable glands:

- M20: 5 to 9 mm (0.2 to 0.35 in)
- M16: 2 to 6 mm (0.08 to 0.24 in)
- ½ in NPT: 6 to 12 mm (0.24 to 0.47 in)
- Ethernet: 4.7 to 6.35 mm (0.187 to 0.25 in)

Analog outputs

Number

- Two supplied as standard
- Four with module board fitted

Output ranges

Analog output programmable to any value between 0 and 22 mA to indicate system failure

Accuracy

±0.25 % of reading or 10 µA (whichever is the greater)

Maximum load resistance

500Ω at 20 mA

Configuration

Can be assigned to either measured variable or either sample temperature

Isolation

- Revision A:
    500 V DC from any other circuitry but not from each other
- Revision B:
    500 V DC from any other circuitry

Relay outputs

- 4 standard single-pole changeover
- Fully-programmable
    – Contacts rating: 5 A @ 110/240 V AC
      (Non-Inductive)   5 A @ 30 V DC

Digital input/output

- 1 standard, user-programmable as input or output
- Minimum input pulse duration: 125 ms
- Input – volt-free
- Output – open-collector, 12 to 24 V, 250 mA max.

Connectivity/Communications (optional)

Ethernet
HTTP, HTTPS, FTP, Secure FTP

PROFIBUS DP
DPV0, DPV1

MODBUS
RTU RS485

HART
- Fieldcomm certified version – HART 7
- Configured range
  - 4 to 20 mA, user-programmable across measurement range
- Dynamic range
  - 3.8 to 20.5 mA with 3.6 mA low alarm level, 21 mA high alarm level
- Accuracy
  - ±0.25 % of reading
- Maximum load resistance
  - 500 Ω at 20 mA
- Configuration
  - Can be assigned to either measured variable
- Isolation
  - 500 V DC from any other circuitry

Data logging

Storage
- Measurement value storage (programmable sample rate)
- Audit log*, Alarm log*, Calibration log, Diagnostics log

Storage media
SD card, up to 32 GB capacity

Chart view
On local display

Historical review
Of data

Data transfer
SD card interface – Windows-compatible FAT file system, data and log files in Excel and DataManager Pro compatible formats

Environmental data

Ambient operating temperature:
–10 to 55 °C (14 to 131 °F)

Ambient operating humidity:
Up to 95 % RH non-condensing

Storage temperature:
–20 to 70 °C (–4 to 158 °F)

Altitude:
2000 m (6562 ft) max. above sea level

2-electrode conductivity

Conductivity input

Measurement range and resolution

Cell constant	Conductivity range	Display resolution	Accuracy repeatability
0.01	0 to 200 µS/cm	0.001 µS/cm	
0.05	0 to 1000 µS/cm	0.001 µS/cm	±1.0 % of measurement range per decade
0.1	0 to 2000 µS/cm	0.01 µS/cm	
1	0 to 20000 µS/cm	0.1 µS/cm	

Dynamic response
<3 s for 90 % step change when damping is off

Damping
Configurable: off, low, medium and high

Temperature input

Temperature element types
- Automatic temperature sensor recognition for Pt100, Pt1000 and 3k Balco RTDs in either 2-lead or 3-lead configurations
- Temperature element can be used for automatic temperature compensation of the conductivity solution

Measurement range and resolution

Sensor group	Temperature range	Display resolution	Accuracy repeatability
Pt100 Pt1000 3K Balco	–20 to 200 °C (–4 to 392 °F)	0.1 °C (0.1 °F)	0.1 °C (0.18 °F)
None	User-programmable –20 to 300 °C (–4 to 572 °F)		N/A

Temperature compensation modes
Linear, UPW, NaCl, HCl and NH_3

Reference temperature
25 °C (77 °F)

Configured output range

Cell constant	Min. span	Max. span
0.01	1 µS/cm	200 µS/cm
0.05	5 µS/cm	1000 µS/cm
0.1	10 µS/cm	2000 µS/cm
1	100 µS/cm	20000 µS/cm

*   Audit log and Alarm log data are stored in the same log file

7998 016	Flow-through (without wiper unit)	0.001 (< 5) 0.01 (> 5)	1.000	40.00

Measurement Principle
90° scattered light measurement.
Compliant to ISO 7027

Maximum Linearity
Typically, <1.0 %

Accuracy [1,2]
Low range version ±2 % of reading
High range version ±5 % of reading or 0.3 NTU
(whichever is greater)

Repeatability [3]
0 to 200 NTU: < 1 %
200 to 400 NTU: 2 %

Limit of Detection [4]
Low range version: 0.003 NTU
High range version: 0.3 NTU

Response time
T90 < 1 min at 1 l/min

Flow Rate
0.5 to 1.5 l/min (0.13 to 0.39 gall [US]/min)

Integral wiper cleaning system
Programmable operational frequency every 15, 30, 45 minutes or multiples of 1 hour up to 24 hours.

Sample operating temperature
0 to 50 °C (32 to 122 °F)

Sample pressure
Up to 3 bar (43.5 psi)

Ambient operating temperature
0 to 50 °C (32 to 122 °F)

Ambient operating humidity
Up to 95 % RH (Non-condensing)

Damping
Configurable: Off, Low, Medium and High

Bubble Filter
Configurable: Off, Low, Medium and High

[1] Maximum measured error across full measurement range (limited by uncertainty in Formazine standards).
[2] Tested in accordance with IEC 61298 Parts 1-4: Edition 2.0 2008-10.
[3] Tested in accordance with MCERTS: Performance Standards and Test Procedures for Continuous Water Monitoring Equipment. Version 3.1: Environment Agency 2010.
[4] Tested in accordance with BS ISO 15839: 2003.

EZLink

This device complies with Part 15 of the FCC Rules.
Operation is subject to the following two conditions:
(1) this device may not cause harmful interference,
 and (2) this device must accept any interference
  recieved, including interference that may cause
            undesired operation.
```

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy, and if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Spares

Sensor module assemblies

AWT420 pH/ORP PCB upgrade/spares kit

Part number
3KXA877420L0014

AWT420 2-electrode conductivity PCB upgrade/spares kit
Part number
3KXA877420L0013

AWT420 4-electrode conductivity PCB upgrade/spares kit

| Part number |
| --- |
| 3KXA877420L0011 |

AWT420 Turbidity PCB upgrade/spares kit

Part number
3KXA877420L0016

EZLink module assemblies

AWT420 EZLink PCB upgrade/spares kit

Part number
3KXA877420L0015

AWT420 EZLink HazLoc PCB upgrade/spares kit

Part number
3KXA877420L0018
—
...Spares

Communications module assemblies

AWT420 HART PCB upgrade/spares kit

Part number
3KXA877420L0051

AWT420 Profibus PCB upgrade/spares kit

Part number
3KXA877420L0052
AWT420 Modbus PCB upgrade/spares kit

Part number
3KXA877420L0054
AWT420 Ethernet PCB upgrade/spares kit

Part number
3KXA877420L0065
AWT420 analog output PCB upgrade/spares kit

Part number
3KXA877420L0056
Mounting kits

Panel-mount kit

Part number	
3KXA877210L0101	Panel-mount kit, including fixings, flanges, clamps and seal
Pipe-mount kit

Part number	
3KXA877210L0102	Pipe-mount kit, including pipe-mount adapter plate, brackets and fixings (excludes pipe)
Wall-mount kit

Part number	
3KXA877210L0105	Wall-mount kit
Weathershield kits

Weathershield kit

Part number
3KXA877210L0103
Weathershield and pipe-mount kit
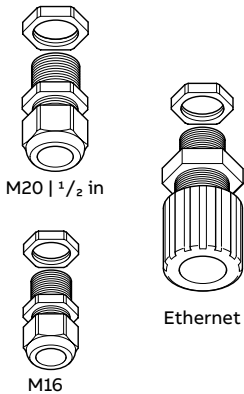

Part number
3KXA877210L0104
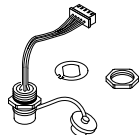

Gland packs/EZLink connectors

Gland packs

| Part number		
3KXA877420L0111	M20 (qty. 5), M16 (qty. 2)	
3KXA877420L0112	½ in NPT (qty. 5), M16 (qty. 2)	
3KXA877420L0113	M20 (qty. 4), M16 (qty. 2) Ethernet (qty. 1)	
3KXA877420L0114	½ in NPT (qty. 4), M16 (qty. 2) Ethernet (qty. 1)	
3KXA877420L0115	Ethernet gland (qty. 1)	
3KXA877420L0116	Ex-E gland pack (5 × M20, 2 × M16)	
3KXA877420L0117	Ex-E gland pack (5 × ½ in NPT, 2 × M16)	
3KXA877420L0118	Ex-E gland pack (4 × M20, 2 × M16, 1 × Ethernet)	
3KXA877420L0119	Ex-E gland pack (4 × ½ in NPT, 2 × M16, 1 × Ethernet)	

M20 | ¹/₂ in

Ethernet

M16

EZLink and EZLink HazLoc connector assembly

Part number
3KXA877420L0066

EZLink extension cable assembly

Part number	Description
AWT4009010	1 m (3.3 ft)
AWT4009050	5 m (16.4 ft)
AWT4009100	10 m (32.8 ft)
AWT4009150	15 m (49.2 ft)
AWT4009250	25 m (82.0 ft)
AWT4009500	50 m (164.0 ft)
AWT4009000	100 m (328.0 ft)
